

IDEAS

Sustainability

Renewable energy:

Shadow Energy - Shadow energy is from a sustainable and renewable source, which is perfect to put behind tall buildings that will cast huge shadows. This ties into Global Goal 7, Affordable and clean energy and will improve our liveability by providing cheap energy for the citizens.

Solar Energy - Using the sun's energy to power things up.

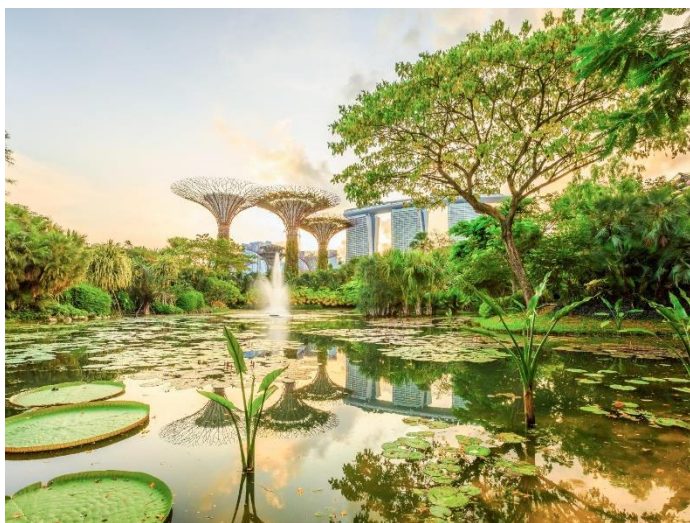

Solar Energy is another example of a renewable energy source, these panels can be installed on rooftops, car parking lots and even on top of streetlights.

Solar panel powered streetlights: This idea ties into bot Street lights will increase light in the area when it is dark. It will help residents to move through the roads.

Green Spaces:

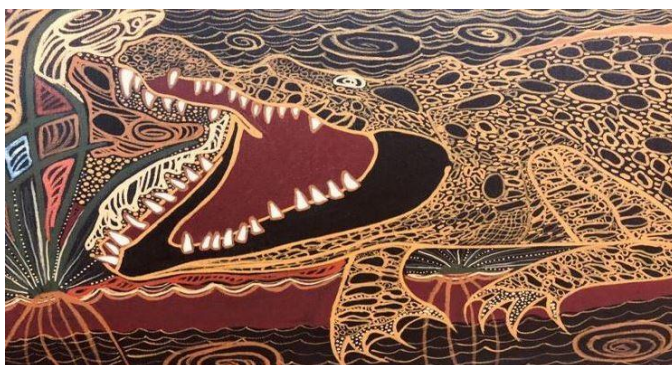

Recreation

Forest Décor Swimming pool. Plants around the swimming pool. Cave in the pool

- Bridge decorated in Aboriginal paintings
- Fill river with native fish
