

E-Portfolio

Year 9 Media

Use this worksheet to plan out the information that you are going to include in your e-portfolio

SECTION ONE - Pre-production

IDEA DEVELOPMENT

- How did you come up with your original ideas?
- What did you take inspiration from?
- What directions did your discussion go in your group?
- What other ideas did you have for the production?
- Why did you decide not to use these ideas?
- Who did you discuss your idea with and what feedback did they give you?
- Write one sentence summing up the final idea that you decided to use
- Summarise the effectiveness of your brainstorming/idea development phase. What should you have done differently and what impact would this have had?

PRE-PRODUCTION PLANNING

- What pre-production planning documents did you create?
- How were these pre-production documents beneficial to your overall process?
- Were there additional documents that you should have created?

In this section use extracts from your pre-production planning to show your process

SECTION TWO - Production

- What technology did you use to create your production?
- Describe some ways that you used this technology and what effect did this have on your production?
- Evaluate your use of technology.
 - What worked well?
 - What didn't go well?
 - How could you have improved your use of technology?
- What did you learn throughout the process filming the production?
- What did you need to do differently?

SECTION THREE - Post-Production

- Describe how you edited your project together?
- What functions in Premiere did you use?
- What other programs/technology did you use?
- What went well throughout the process?
- What did you need to do differently?
- How would have done things differently to improve this process?

In this section use screen shots of your edit to explain/annotate your process.

SECTION FOUR - Final Evaluation

- What are the best aspects of your production?
- What areas needed to be improved?
- What did you learn from making the production?
- What will you do differently next time?

In this section use extracts from your production to evaluate it. Use screenshots and annotations to discuss what worked, what needed to be improved and what you learnt.
